

Spotlight on the Dorset Collection from Questech

The Dorset Collection is arguably **CONESTOGATILE**'s most successful decorative offering in the company's history. **Questech** seems to do everything right, from the detail shown in the cast stone and metal designs, to the lifetime sealer applied to all of their products. The accompanying literature piece reflects the prestige by which the offering is presented and is only a hint of things to come. **CONESTOGA TILE** stocks all of the items from the Dorset Collection and soon will be introducing towel bars and paper holders to the Portico Bath Accessories. **Questech** previewed some prototype styles for future introduction at the Coverings 2007 show in Chicago and came away with rave reviews from their distributors. A complete tower display that features the entire collection is available by contacting your **CONESTOGATILE** sales representative.

Schluter Ditra Reminder

Here are a few points to remember when using Schluter's Ditra:

- In-floor heating systems should be installed underneath the Ditra.
- Tile or natural stone smaller than 2 x 2's should not be installed over Ditra.
- Non-modified mortars should be used to set tile or stone over Ditra. Modified mortars can be used to set Ditra to the substrate, particularly if setting over plywood.
- Installations of natural stone require two layers of wood sub floor, regardless of the joist spacing, prior to the installation of Ditra.

The Ditra system continues to grow in popularity and acceptance here in the U.S. as well as other parts of the world.

Enclosures - Price Lists

Dolce Vita - We are soon ready to introduce our fourth product from Dolce Vita called Villa Tivoli. Villa Tivoli combines subtle shade variations and an array of marble graphics to create a uniquely styled floor and wall combination. As with all Dolce Vita products, Villa Tivoli offers a number of field tile sizes, decorative elements and mosaics to complement the series. The remaining product sales (Isole, Jerusalem Stone and Tuscany) continue to remain strong.

Preformed Components - This collection of products consists of shower pans, shower slopes, niches, seats and curbs made from high density foam to facilitate tile and stone installations, primarily in wet area applications. Each item shown on the price list includes installation instructions and a complete literature piece is included in this mailer. Please take note that some of the niche sizes have changed and additional sizes of the preformed shower pans are now available as well. The price list indicates this product is priced as "Net Pricing" and no trade discounts apply.

Seneca Tiles - The premiere hand-crafted tile manufacturer in the U.S. is Seneca Tiles. Their product offering has stood the test of time with a few modifications over the years. In addition, Seneca Tiles has complemented their manufactured products with glass and specialty products made in Europe.
