naturale rett.

Waterfall rilegge in modo realistico e fisico una pietra rocciosa e antica come l'ardesia. Ricreando sulla superficie del grès gli effetti cangianti tipici delle pietre rocciose sedimentarie, Waterfall registra texture, irregolarità e variazioni di colori, espressioni puntuali del trascorrere del tempo.

Waterfall realistically and physically represents slate, an ancient and natural stone. Recreating, on the stoneware surface the iridescence typical of sedimentary rocks, Waterfall has texture, irregularities, and variations in colour, typical expressions of the passage of time.

Le cromie, di base grigie, spaziano dalla tonalità più scura, il Dark Flow, a quella più chiara, Ivory Flow, richiamando il naturale processo di ossidazione della pietra, materia in continua trasformazione che cambia colore, forma e struttura, adattandosi all'evolversi dei fenomeni naturali.

The colours, in grey scale, vary from the darkest tone, Dark Flow, to the lightest, Ivory Flow, recalling the natural oxidation process of the stone, a material that is under continuous transformation, changing colour, shape, and structure, and adapting itself to the evolution of natural phenomenon.

La ricerca di Lea Ceramiche è andata oltre, adoperandosi non solo a restituire un materiale dalle qualità prestazionali indiscutibili, ma riuscendo a conferire una stratigrafia più complessa.

Con l'inclusione di altre tipologie di pietre come le quarziti brasiliane, si è arrivati ad una perfetta definizione estetica, un'armonizzazione grafica che conferisce alla materia eleganza e che interagisce col mutare della luce.

Lea Ceramiche's research went above and beyond, striving not only to create a material of indisputably high quality, but also successfully lending it a more complex stratigraphy.

With the inclusion of other types of stone, like Brazilian quartzite, the perfect aesthetic definition has been achieved, a graphic harmony that gives elegance to the material and that interacts with the changing light.
