

WOODRIDGE

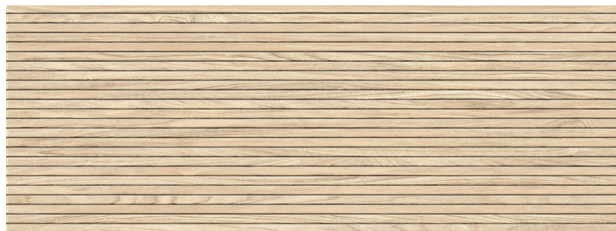

Ceramic Wall Tile

The most up-to-the-minute trend in interior design is wood panelling for walls. The use of thin wooden slats to cover walls serves a purely aesthetic function, but transmits the warmth and personality of the original material to the rooms.

MLW gets on board with the wood panelling trend by presenting the white body Woodridge model in 18x48" format, which recreates the look of wooden slats. The collection is available in oak, ash and cypress tones. Moreover, it is an ideal complement to any other series, since it can be installed on an entire wall, or just a section of it to create baseboards, headboards or cozy nooks.
